

Improvements.

New Button named “ **TBOX-Graph** “ is added to display the Taxonomy of the Tree.
and also popupmenu item **CHILD OF NODE** and **ONLY CHILD OF NODE** is also added.

For displaying the different levels new Panel “**LEVEL Setting** “ is added to the settings Tab.

Addition made in the code:

For this new Java file Visualisation1.java
RiceHandleSelect1.java
RiceAdapter1.java are added.

Some codes are added also in ClientJApplet.java is also call access this classes.

The interface with this addition will look like.

I have given short description only .

This picture is got after clicking **TBOX-Graph**.

2)Moving to the setting Tab and selecting the level as 3

3)Right Clicking on the individual item and selecting the corresponding Menu.

Concepts:

- DEFAULT
- FAMILY
- FAMILY-11

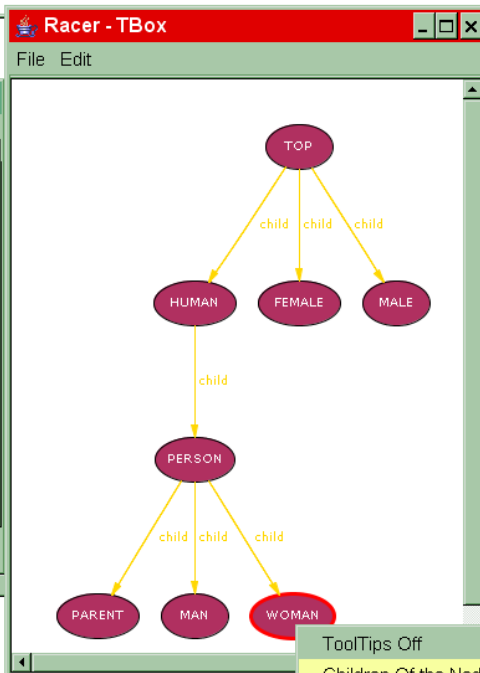

Settings
